PROJECTS

React Components Showcase platform (Mini Project)

Project links--> https://github.com/Kartikeyasthana9/react-component-showcase-platform
The purpose of the project is to showcase developers' talents; using this platform, they may directly share their expertise of designing React components. It is also useful for newbies that want to start utilising React.

Text-O-Matic (Major project)

Project link--> https://github.com/Kartikeyasthana9/Text-O-Matic
The Text-O-matic is an online web application that allows users to analyse any text and receive a summary of it. He may submit the data via a link or upload a document file.
The platform also enables him to transform the material into an audiobook.
